We are concerned about the high density residential (tall) buildings proposed for the north end of the project. The streets cannot handle the additional traffic and congestion that will be generated by those buildings as well as the collateral congestion created by the traffic to and from the businesses that will be drawn to the area- there will have to be grocery and drug stores, restaurants, etc. And naturally the buildings will cast giant shadows over the remaining open space.

Overall we like the project but these tall building should be eliminated or relocated closer to Chicago Avenue, which can better absorb increased traffic

Respectfully,

Ronald J. Broida, 1122 N. Dearborn St., 19 J
